"The House Famous for Lawn Grass Seed"

The joy of gardening—

SUCCESS in gardening imparts a mingled feeling of joy and pride to those who put forth untiring efforts to attain it.

But this *success* is dependent upon the *quality* of the Seeds, Bulbs or Plants one purchases, this *quality* again reverting back to the integrity and reputation of the seedsman.

The responsibility of the seedsman is immense. He must earn the confidence of those who buy from him, particularly superintendents and head gardeners of private estates, for they cannot jeopardize their position or reputation as capable men by purchasing stocks from sources of unknown repute. This mutual feeling of confidence between the seedsman and gardener can only be built up through years of faithful service.

For close to a quarter of a century we have provided some of the largest gardens and estates in America with our selected Stocks of Vegetable, Flower and Field Seeds, the products of which have gained Highest Awards in Competitive Horticultural Shows, while our Grass Seeds have earned for us the title of "*The House Famous for Lawn Grass Seed.*"

We are again prepared to make this Gardening year for you a success and joy with our unfailing Standard of Efficiency "Reliable Seeds and Prompt Service."

Burnett's Lawn Grass Seed Mixtures

Lawn View of Private Estate Sown with Burnett's "Special" Lawn Grass Seed Mixture.

Burnett's "Special" Lawn Grass Mixture

The above mixture is made from our own formula, and composed of grasses specially adapted for the purposes of producing turf which retains its rich green color and velvety appearance throughout the entire Summer and Fall. In making up this high grade mixture we are careful to use only the very finest quality of all the most desirable dwarf evergreen, recleaned grasses, free from chaff and weeds, which thrive well on any soil, thus ensuring a beautiful and permanent lawn. To obtain best results Lawn Grass Seed should be sown as soon as the ground can be prepared in early Spring. It may also be sown in the Fall with good results.

Quantity Seed Required

For making New Lawns, we recommend sowing at the rate of 125 lbs. to the acre (approximately 6 bushels). Where small quantity is required, sow 1 lb. to each 400 square feet (20' x 20'). **For renovating old lawns, use half the quantity.**

1 lb. 60c., 2½ lbs. \$1.40, 5 lbs. \$2.75, 10 lbs. \$5.25, 20 lbs. \$10.00, 100 lbs. \$50.00

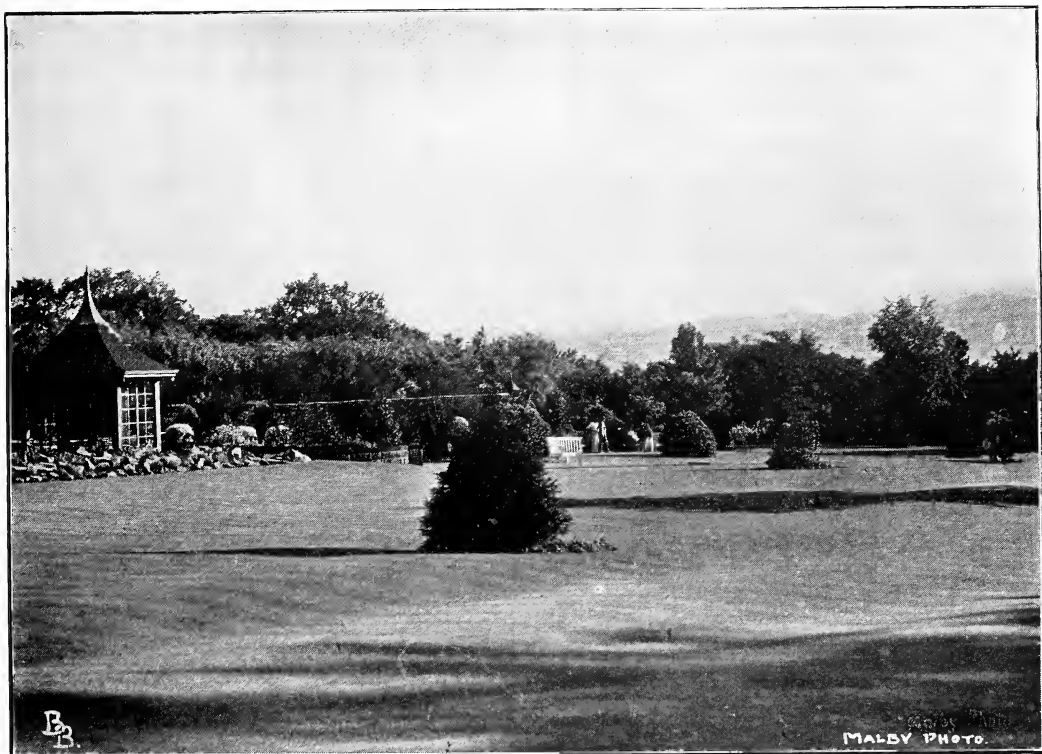

(20 lbs. of Burnett's "Special Mixture" is approximately one bushel.)

Lawn Remarks

A perfect and enduring lawn, one of velvety appearance with closely interwoven, firm, deep and elastic turf, is only created by sowing a composition of the various kinds of grass seeds suited to the conditions and the climate. Several varieties are needed, that the lawn may be evergreen during all seasons and the seeds must be sown liberally (at the rate of from five to six bushels per acre), not only that a lawn may be produced quickly, but because the kinds of grasses suitable for perfect lawns are fine-leaved and should take entire possession of the ground promptly, thus checking the development of weeds, the seeds of which are in all soils. Good, rich deeply worked soil, either of a friable texture or thoroughly drained, is as necessary for the production of a perfect lawn as for garden crops. Early and frequent mowing and rolling, as well as the liberal application of water, which should be applied in the early morning, or late afternoon during dry seasons, is one of the secrets of maintaining beautiful green turf from early Spring to late Fall.

Prevent and Control BROWN PATCH in your lawn. SEMESAN controls this fungous disease.

Burnett's Lawn Grass Seed Mixtures

View of Lawn sown with Burnett's Famous "KILLARNEY" Lawn Grass Seed Mixture.

Burnett's "Killarney" Mixture

Burnett's Lawn Grass Seed Mixture "Killarney" is composed of a combination of the very finest European grasses and fescues, the highest grades possible to procure, and specially adapted for this climate. This mixture is composed of all solid, re-cleaned seeds of the highest germination. Therefore, owners of large estates requiring a permanent sod and everlasting lawn should by all means use this high-grade mixture. If the ground is properly prepared, we are certain "Killarney Mixture" will produce a turf of velvet, equal to the most famous Lawns in Europe. Give it a trial. "Sow Killarney and walk on Velvet."

1 lb. 65c., 2½ lbs. \$1.60, 5 lbs. \$3.00, 12½ lbs. \$7.50, 25 lbs. \$14.00, 100 lbs. \$55.00

(25 lbs. of "Killarney Mixture" is approximately one bushel.)

Burnett's "Central Park" Mixture

This well-known mixture contains a large proportion of permanent grasses that grow quickly, producing a rich, green sward in about four weeks from time of sowing. "Central Park" is very hardy and has always given entire satisfaction in any location wherever sown. **1 lb. 50c., 2½ lbs. \$1.20, 5 lbs. \$2.25, 10 lbs. \$4.25, 20 lbs. \$8.00, 100 lbs. \$40.00**

(20 lbs. of "Central Park Mixture" is approximately one bushel)

Burnett's "Play Ground" Mixture

The above mixture is adapted for a strong, hard-wearing turf of the finest texture, and is composed of some of the hardest grasses, which will produce a close, thick sod and stand hard usage under all conditions. For Play-Grounds or any place where a strong turf is necessary, this mixture cannot be equaled. We recommend sowing separately some white clover with this mixture.

20 lbs. \$9.00, 100 lbs. \$42.00.

(20 lbs. of "Play Ground Mixture" is approximately one bushel.)

Note: To destroy worms in your lawn, use Electric Worm Eradicator. (See page 108.)

Burnett's Lawn Grass Seed Mixtures

View showing Lawn sown with Burnett's "SHADY PLACE" Lawn Grass Seed Mixture.

Burnett's "Shady Place" Mixture

When a lawn is much shaded, either in whole or in part, the shaded portions should be sown with Burnett's "Shady Place" Lawn Grass Seed Mixture, which is a combination of fine, dwarf-growing evergreen varieties, which, in their wild or natural state, are to be found growing in the woods or other sheltered or shady places. Under or in the immediate neighborhood of large trees fertilizers should be applied liberally and frequently, for the trees absorb the fertilizer and impoverish the ground. Ground much shaded is very frequently sour, and if the drainage is defective it is apt to be covered with moss. In such cases an application of lime or wood ashes raked in will sweeten the soil, but the moss should be first removed with a sharp steel-toothed rake.

1 lb. 75c., 2½ lbs. \$1.80, 5 lbs. \$3.50, 10 lbs. \$6.50, 20 lbs. \$12.00, 100 lbs. \$55.00
(20 lbs. of Burnett's "Shady Place Mixture" is approximately one bushel.)

Burnett's "Bank and Terrace" Mixture

On sloping banks it is often necessary to use sod, as heavy rains wash the soil off before the grass seed has time to germinate. It is sometimes even necessary, in sodding very steep banks, to use pins eight or ten inches in length to pin the sods in place, to prevent them from being washed down by excessive rains before the grass roots have had time to fasten in the soil. The Terrace mixture which we offer is composed of deep-rooting grasses which, if once established, will hold the soil and prevent washing, and we advise liberal fertilizer and seeding so that the grasses may be quickly established.

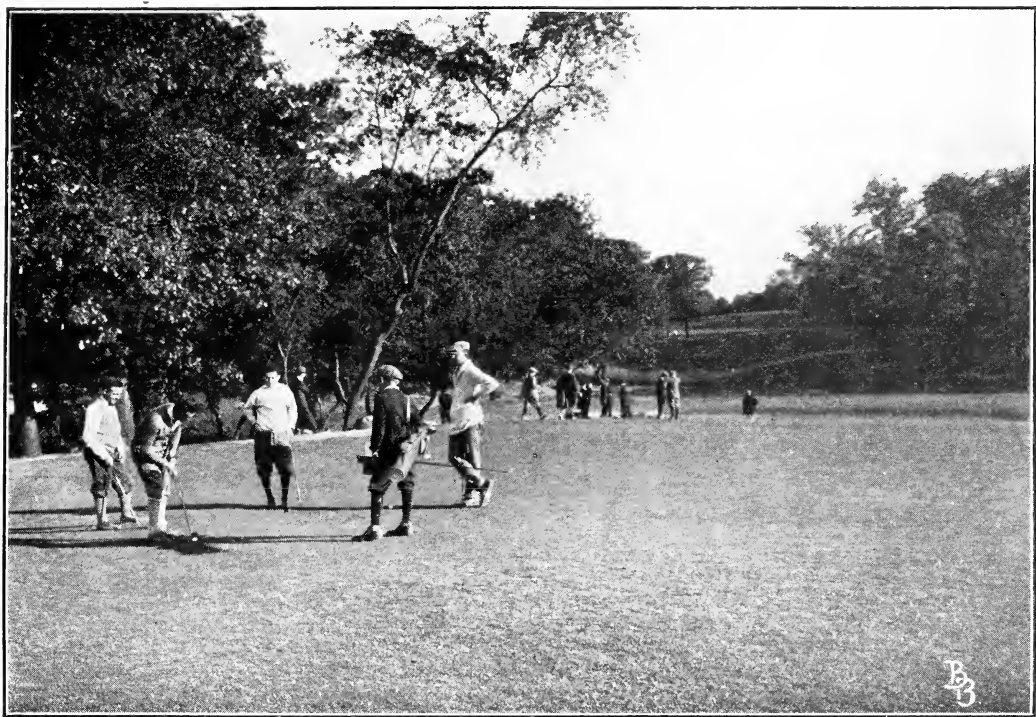

1 lb. 60c., 2½ lbs. \$1.40, 5 lbs. \$2.75, 10 lbs. \$5.25, 20 lbs. \$10.00, 100 lbs. \$50.00
(20 lbs. of Burnett's "Bank and Terrace Mixture" is approximately one bushel.)

Burnett's "Seashore" Mixture

If a few inches of top soil is spread over the surface, and well firmed, an application of Burnett's Special "Seashore" Mixture will produce a good lawn in six or eight weeks. An occasional application of pure Sheep Manure during the spring, summer and fall months will increase the strength and color of the grass. Our formula has been thoroughly tested out in various localities. If the soil is exceptionally poor, and it is not possible to apply a layer of top soil, White Clover will help to make the sod thick, and also protect the grass.

1 lb. 50c., 2½ lbs. \$1.20, 5 lbs. \$2.25, 10 lbs. \$4.25, 20 lbs. \$8.00, 100 lbs. \$40.00
(20 lbs. of Burnett's "Seashore Mixture" is approximately one bushel.)

BURNETT'S GRASSES AND CLOVERS

FOR HAY, MEADOWS AND PERMANENT PASTURES

OUR Permanent Pasture, Hay and Meadow Mixtures are composed of varieties of grasses best adapted for producing an abundant and nutritious food supply for stock. Our formulas are arranged with great care and the mixtures are made to suit the exact location and condition of soil, etc., for which they are needed.

Nothing but the best re-cleaned seeds are used, consequently it does not take so large a quantity per acre as that generally used when poor quality mixtures are sown.

We recommend four bushels to one acre, which may be sown either in the Spring or Fall, with an additional ten pounds of Mixed Clovers sown early in the Spring. When ordering please state whether for high, dry, medium, wet or heavy soil.

The field from which this stock seed was selected yielded 175 bushels per acre, every stalk producing two or more ears. The high degree of excellence of Burnett's Improved Evergreen was obtained by having our grower carefully select the stock for the past three years, so that we have now a sugar corn that has reached the highest state of perfection. **For Main Crop and Exhibition
Purposes "Liberty" has No Equal**

Liberty Tomato, introduced by us some years ago, still holds undisputed reputation as the best main crop and exhibition variety. The fruit is of a glossy red color, large, perfectly round, uniform in shape, very solid, and meaty, of superb quality with few seeds, and borne in clusters of from ten to twelve perfect fruits. NOVELTIES AND SPECIALTIES IN FLOWER SEEDS

All gardening enthusiasts are more or less interested in something new in the floral world, and for this reason we keep in touch with all new introductions as they appear from year to year. The few novelties and specialties offered below have been selected by us as having a good claim to merit and are well worthy of a trial.

ANEMONE ST. BRIGID **"Creagh Castle Strain"**

Anemones, especially the St. Brigid variety, have now attained great popularity and we, therefore, welcome the opportunity of introducing this present strain which has originated in the home of St. Brigid Anemones.

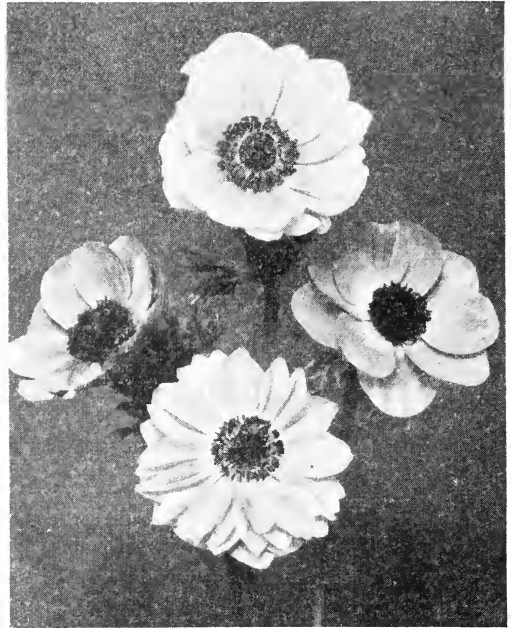

The flowers are extremely large and the range of colors exceptional. **Pkt. 50c.**

ANCHUSA **Annual "Blue Bird"**

The perennial Anchusa, the "Dropmore variety," is deservedly popular for its lovely bright blue flowers. This esteem has been shared to some extent by the annual Anchusas. This novelty, which grows about 18 inches high, is of compact habit. Flowers are of a vivid indigo blue and of brilliant effect in any scheme for the decoration of beds and borders. **Pkt. 50c.**

ANTIRRHINUM **New Rock Hybrids**

Forms small compact bushes with variously coloured flowers, shades of rose, pink, purple, mauve and bicolors being produced in great profusion, and is eminently suitable for the decoration of rock and alpine gardens, also for edging beds and borders. **Pkt. 50c.**

Anemone St. Brigid, "Creagh Castle Strain"

ACER-LEAVED MALLOW **(Sphaeralcea acerifolia)**

A handsome quick-growing perennial from Oregon, about 2½ feet high, bearing long spikes of pale rose blossoms about 2 inches across. The flowers cluster in the axils of the large maple-like leaves, from which the plant derives its specific name. It should be noted that the Acer-leaved Mallow loves moisture and is impatient of drought. **Pkt. 50c.**

ASTER DELAVAYI

A unique hardy perennial Aster. Nothing more beautiful can be imagined than this wonderful species. Its main feature is possibly the jet black centre. When in full bloom the lavender florets form a beautiful picture in themselves. When first appearing, and during the development to full flowering, they are twisted and curled into most delightful forms. **Pkt. 50c.**

ASTER, PEERLESS YELLOW

It has been difficult to get a good yellow Aster. We have been working constantly for several years and have at last developed one that is quite good. It can be described as of American Branching habit, height about two feet, flowers of good size and form, petals slightly incurved, but no trace of quills as in the earlier forms of the yellow Aster.

The color is a deep yellow when first opened, and fades slightly as it ages. **Pkt. 50c.**

Flower Seed Novelties and Specialties—Cont'd

ARCTOTIS SCAPIGERA

A half-hardy, dwarf herbaceous species from South Africa. Of vigorous growth and produces large flowers $2\frac{1}{2}$ to 3 inches across in a great variety of colours. Very showy and effective. Wintered in frame it is at its best the second year. **Pkt. 50c.**

NEW FORCING CALENDULAS

"Radio"

A very fine Calendula with a distinct break in the formation of the flower. The petals are beautifully quilled which has an extraordinary effect on the appearance of the flower. The colour is a very deep orange, and the flowers which are extremely globular in shape, do not show in the centre until a very advanced stage. **Pkt. 50c.**

"Sensation" (Campfire)

A distinct new type. It is of vigorous growth, the flowers borne on stout stems, needing little disbudding. The blooms are flat, and are undoubtedly larger than those of any type previously introduced. $\frac{1}{4}$ oz. **\$1.25; Pkt. 25c.**

CINERARIA, "Burnett's Purple Mantle"

A real purple without any washy magenta shading. Forms a compact bushy plant from 15" to 18" high, clothed overhead with its dense mantle of large purple flowers (hence its name). As a decorative pot plant it is in a class by itself—distinctively charming. **Pkt. \$2.00.**

COSMOS

"Early Express Pink"

An extra early Cosmos flowering in from forty-five to fifty days from the time seed is planted. The plant grows about two and one-half to three feet high and is covered with medium sized bright pink flowers. $\frac{1}{4}$ oz. **\$1.50; Pkt. 25c.**

DAHLIA

Orchid-flowered "Starfish"

Orchid Flowered Dahlias are a recent introduction from Europe where they have won many prizes. They are a single Dahlia of medium height. The petals are twisted in such a manner as to give them a star effect. The colors are a good mixture. The petals are usually of another color on the back. Quite often they are dotted and blotched both on the top and the bottom so that, as the flower opens, the twisted petal gives it a bizarre effect. **Pkt. 50c.**

DAHLIA

Coltness "Improved Hybrids"

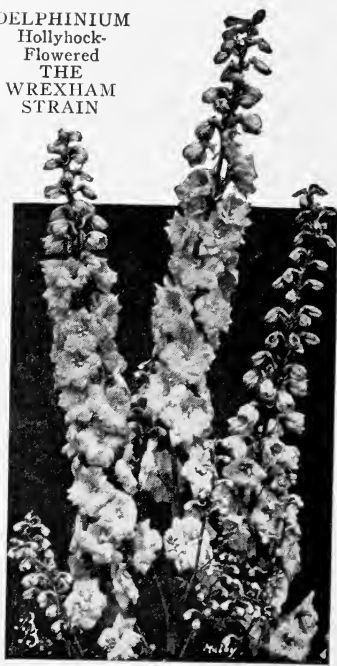

The annual Single Dahlias are much prized for their light and graceful decorative flowers. These new hybrids with their pastel shades of delicate pinks, mauves and roses and their richer yellow, scarlets and purples will win many new friends. Plants are of dwarf habit and compact, producing great quantities of flowers. **Pkt. 50c.**

DELPHINIUM

"Wrexham Strain"

The seed of these beautiful Delphiniums we import direct from a celebrated English grower. Considered the finest type of all. Colors range through the entire range known to delphiniums. **Pkt. \$2.00, 3 Pkts. \$5.00.**

A perennial Poppy, discovered in Thibet, throwing up strong stems 3 to 4 feet high, terminating in large, four-petalled blossoms of a glorious sky-blue, around a central zone of golden yellow anthers. Of rare beauty and one of the most valuable plant discoveries in many years. **Pkt. 75c.**

This very showy plant will do excellent service both for cutting and for garden decoration. **Pkt. 35c.**

A half-hardy South African annual which can be grown either outdoors or under glass. About 2 to 3 feet high, with long serrated leaves and flowers 3 inches across of a most brilliant orange with dark centre and black purple zone. Burnett's Reliable Flower Seeds

A well planned Old-fashioned Garden

Aid for the Amateur.

One of the most fascinating and economical ways of making a flower garden, is in raising the plants from seed. One sees far too many of those summer gardens of Cannas, Geraniums, Salvias, Coleus, etc., that are more or less characteristic of the order telephoned to the florist round the corner, to "come and fix up the garden"; very effective in their way, but their similarity and frequency are monotonous, and what is more, such gardens are expensive. A few packages of well chosen annual seeds costing but a few cents, give far more enjoyment in the raising, and a much more useful and interesting variety of flowers.

Flowers that can be raised from seed are divided into 7 classes, viz:—

H. A.—Hardy Annuals. Seeds sown outdoors where they are to bloom; they die after the first year.

H. H. A.—Half Hardy Annuals. Those that are sown under glass in the early Spring and transplanted outdoors in April and May.

H. B.—Hardy Biennials. Seeds sown outdoors and bloom the next year; some bloom the first year if sown early.

H. H. B.—Half Hardy Biennials. Seed sown one year under glass and planted outdoors the following Spring.

H. P.—Hardy Perennials. Seeds sown outdoors one year, bloom the next and each succeeding year without protection.

H. H. P.—Half Hardy Perennials. These bloom from seed the second year, but need winter protection thereafter.

G. P.—Greenhouse Plants. Tender plants for growing under glass.

Our list of Flower Seeds has again been carefully revised and comprises only the choicest and most select types in their respective classes, which we are certain will give satisfaction.

BURNETT'S BEAUTIFUL ASTERS

THE Aster is today the most popular of all Summer and Autumn flowering plants. We take special care to secure the best stocks, true to name and color, without regard to cost. For best results the ground cannot be too richly prepared. Plants from seed sown in the open ground in May will bloom in September and October. For July and August flowers, sow in March or April, in coldframes or hotbeds. We especially recommend the following as being the best for cutting and general garden use.

HORTICULTURAL TOOLS and SUNDRIES

DURING our many years in the seed business, we have been called upon from time to time to procure for some of our many customers, certain British-made Horticultural Sundries, to which they had grown accustomed since their apprenticeship.

These many requests have resulted in this array of tools illustrated above.

For the convenience of our patrons, we have standardized these implements and offer them in addition to our regular high grade American made goods, as a feature of Burnett Brothers.
